

Questions 52 to 55 are for men and women.

We can learn even more about nutrition and health by measuring vitamins etc. in blood samples. We would therefore be very grateful if you would agree to have a blood sample taken by your doctor. If you agreed, we would send a kit for you to take to your doctor. This will be done during the next few months. As we have already received sufficient blood samples from some age groups it may not be necessary for you to provide a sample. However, any blood provided will not be analysed immediately but will be stored frozen until needed.

52. Would you be prepared to go to your doctor for a blood sample (30 ml or six teaspoons) to be taken? Yes No

If yes, please give the name and address of your doctor so that we can inform them of the study

Doctor's name
Doctor's address

53. If we have any queries about your answers to this questionnaire, would you be happy for us to contact you? Yes No

If yes, please give your telephone number

Telephone Daytime Evening Anytime
Dialling code Number

We would like to write to you again to tell you about the progress of EPIC and to find out whether your diet has changed. In case you change your address and we lose contact with you, could you give us the name and address of a friend or relative who would know your new address?

Please inform them that you have done this.

54. One of the objectives of EPIC is to study the relationship of nutrition with the occurrence of certain diseases such as cancer which are registered by the National Health Service (NHS). To cross-check with this information it would be very helpful if you could fill in your NHS number (this is on your medical card), your surname at birth (if this was different from your current surname), and your place of birth.

NHS number
Surname at birth

Place of birth Name of town
county
country
